

nmon insights : CPU, MEM, TOP Commands and Process

Report name : nmon insights Report

Owner : Abhishek Panakkaran

Version : Beta

Support : as-is

email: abhishek.vcp@gmail.com

Nmon-file-insigts

note *data source is *.nmon file schedule like below

/usr/bin/topas_nmon -F /var/nmon/lparname_23052022.nmon -t -s 900 -c 96

aixServerSample1 : CPU consumption %

aixServerSample1 : Cores consumed from pool

aixServerSample1 Top commands consuming CPU

aixServerSample1 (100 == 1 CPU) Top 10 PID with highest CPU consumption

aixServerSample1 : Number of process by commands

aixServerSample1 Top 10 PID with highest Memory consumption in MB

aixServerSample1 : Number of process by commands

aixServerSample1 : Average Disk Busy%

aixServerSample1 : Average Disk write KB

aixServerSample1 : Average Disk read KB

aixServerSample1 :Average Disk Transfer Total (read IO + Write IO)
